

“I switched to the Oakwood Pharmacy when I moved because of the convenience and the free delivery option. These conveniences are why I’m still a customer today.”

David B,
Oakwood Resident

The Medication Review and participation in the Pharmacist – Oakwood Partners (POPs) program are offered as part of the Sharing Active Independent Lives (SAIL) membership, the clinicians specialize in geriatric pharmacy and can also help advocate for the member with the medical team, and the older adult has an opportunity to learn from the clinicians and also help teach the UW School of Pharmacy students about needs of older adults living in the community.

Ann Albert,
AgeBetter Executive Director

Oakwood Pharmacy offers so much more than medications.

We pride ourselves on being a valuable member of your health team. Through advocacy, education, and being a provider of all things health-related, we are here to help you thrive.

OAKWOOD
PHARMACY

Your Oakwood Pharmacy is here for you.

We believe value is about more than just keeping prices low. We provide specific solutions to meet your needs.

CONVENIENCE

Receive round-the-clock, time-saving service with prescriptions and over-the-counter (OTC) items delivered free to your door. Scheduled deliveries occur throughout the week, and emergency delivery is available 24 hours a day, seven days a week. Need emergency prescription care after hours? A skilled pharmacist is always available to personally assist you.

EXPERTISE

Our pharmacists have the knowledge and experience to meet your individual needs. Enjoy peace of mind knowing we are here to help you manage medication side effects, ensure prescriptions safely address your medical conditions, select the best OTC options for you, and so much more.

ADVOCACY

As your partner in care, our budget-conscious pharmacists work with your insurance provider to cover medication costs or find acceptable alternatives to deliver the best care at the best value.

AUTO-FILL

Without ever leaving your home or relying on friends and family for prescription pick ups, Auto-Fill, our automatic refill service, ensures medications are delivered directly to you on time.

ADHERENCE SOLUTIONS

Not taking your medications on time, consistently, and as prescribed can lead to adverse health effects. Through aids such as our Med Box program, our staff can assist you in personalized medication management to simplify your life, maximize your health, and maintain your independence.

SELECTION

In addition to a wide variety of prescription and OTC options, Oakwood Pharmacy offers products for dental care, personal hygiene, bladder health, skin care products, and more. Need something specific? Let our staff order what's available; orders typically arrive to the pharmacy in one business day.

BILLING

Instead of payment upon delivery, you'll receive a monthly statement for all OTC purchases and prescriptions not covered by Medicare D and major insurance plans in Wisconsin. Balances are payable via personal check, auto payment from a checking or savings account, or Visa/MasterCard. Please note: If you're an Oakwood Village resident, your pharmacy bill is separate from your monthly Oakwood bill.

UNIVERSITY OF WISCONSIN-MADISON PARTNERSHIP

Through our collaboration with the University of Wisconsin-Madison School of Pharmacy, student pharmacists partner with residents through a variety of opportunities including medication checkups, health monitoring, and educational presentations on a number of health topics including home safety evaluations, medication interactions and much more.

The exemplary pharmacists and pharmacy staff at Oakwood become role models for our student pharmacists. Many tour the pharmacy during their first year with their POPs Partner and learn about all of the services the pharmacy provides. Most are inspired then to sign-up for the fourth year Advance Pharmacy Practice Experience (APPE) rotation because of what they saw and heard during their earlier exposure. The pharmacy staff truly care about the patient population they serve and it is evident every day.
